

Pupil voice for maths

Most children in the school enjoy their maths lessons!

When asked what they like about their lessons, some of our children said:

- Year R – “We like counting and the actions that go with it!”
- Year 1 – “We like number line songs and games!”
- Year 2 – “We like doing challenges and problem solving!”
- Year 3 – “I like fractions and using pictures to help me. I like it when we have an extra challenge!”
- Year 4 – “I enjoyed learning how to add and subtract fractions.”
- Year 5 – “I enjoy learning new maths things, and solving problem solving questions.”
- Year 6 – “We enjoyed maths puzzle week when we solved tricky logic puzzles!”

Children know that they have done well in maths when they get given Dojo points, special mentions and gold stars in their books. When asked what to do if they find any part of maths tricky they said they know how to:

- ❖ Use the maths working wall for extra support.
- ❖ Look at the information on display.
- ❖ Move to ‘working tables’ where they can get extra support from a class teacher.
- ❖ Use a range of maths manipulatives or draw pictures to help themselves.
- ❖ Work with a peer when problem solving.
