Science Progression

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Plants Identify and name a variety of common plants, including garden plants, wild plants and trees, and those classified as deciduous and evergreen Identify and describe the basic structure of a variety of common plants including roots, stem/trunk, leaves and flowers. Seasons Observe changes across the four seasons Observe and describe weather associated with the seasons and how day length varies.		Plants Identify and describe the functions of different parts of plants; roots, stem, leaves and flowers. Explore the requirements of plants for life and growth (air, light, water, nutrients from soil and room to grow) and how they vary from plant to plant. Investigate the ways in which water is transported within plants. Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal			
Everyday material Distinguish between an object and the material from which it is made. Identify and name a variety of everyday materials, including wood, plastic, glass, water and rock. Describe the simple physical properties of a variety of everyday materials. Compare and group together a variety of everyday materials on the basis of their physical properties.		Everyday material Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter.	Everyday material Compare and group materials together, according to whether they are solids, liquids or gases Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.	Everyday material Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets Understand that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic Demonstrate that dissolving, mixing and changes of state are reversible changes Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.	
Animals including Humans Identify and name a variety of common animals that are birds, fish, amphibians, reptiles and mammals Identify and name a variety of common animals that are carnivores, herbivores	Animals including Humans Notice that animals, including humans, have offspring which grow into adults Find out about and describe the basic needs of animals, including humans, for survival (water, food and air)	Animals including Humans Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat	Animals including Humans Describe the simple functions of the basic parts of the digestive system in humans Identify the different types of teeth in humans and their simple functions		
Identify and name a variety of common	needs of animals, including humans		sic their own food; they get nutrition from	their own food; they get nutrition from what they eat Identify the different types of teeth in humans and their simple functions	their own food; they get nutrition from what they eat Identify the different types of teeth in humans and their simple functions

Science Progression

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles and mammals, and including pets).	Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	have skeletons and muscles for support, protection and movement.	chains, identifying producers, predators and prey.		
Identify, name draw and label the basic parts of the human body and say which parts of the body is associated with each sense.					
	Living Things and their Habitat		Living Things and their Habitat	Living Things and their Habitat	Living Things and their Habitat
	Explore and compare the differences between things that are living, dead, and		Recognise that living things can be grouped in a variety of ways	Describe the differences in the life cycles of a mammal, an amphibian, an insect	Describe how living things are classified into broad groups according to common
	things that have never been alive		explore and use classification keys to help group, identify and name a variety	and a bird	observable characteristics and based on similarities and differences, including
	Identify that most living things live in habitats to which they are suited and		of living things in their local and wider environment	Describe the life process of reproduction in some plants and animals.	micro-organisms, plants and animals
	describe how different habitats provide for the basic needs of different kinds of		Recognise that environments can change		Give reasons for classifying plants and animals based on specific characteristics
	animals and plants, and how they depend		and that this can sometimes pose		annials based on specific characteristics
	on each other. Identify and name a variety of plants and		dangers to living things		
	animals in their habitats, including micro-habitats				
	Describe how animals obtain their food from plants and other animals, using the				
	idea of a simple food chain, and identify				
	and name different sources of food.	Forces and Magnets		Forces and Magnets	
		Compare how things move on different surfaces		Explain that unsupported objects fall towards the Earth because of the force of	
		Notice that some forces need contact		gravity acting between the Earth and the falling object	
		between two objects, but magnetic forces can act at a distance		Identify the effects of air resistance,	
				water resistance and friction, that act between moving surfaces	
		Observe how magnets attract or repel each other and attract some materials		G	
		and not others		Recognise that some mechanisms, including levers, pulleys and gears, allow	
		Compare and group together a variety of everyday materials on the basis of		a smaller force to have a greater effect.	
		whether they are attracted to a magnet, and identify some magnetic materials			
		Describe magnets as having two poles			
		Predict whether two magnets will attract or repel each other, depending on which			
		poles are facing.			** 1.
		Light Recognise that they need light in order to			Light Recognise that light appears to travel in
		see things and that dark is the absence of light			straight lines Use the idea that light travels in straight
		Notice that light is reflected from surfaces			lines to explain that objects are seen because they give out or reflect light into
		Recognise that light from the sun can be			the eye

Science Progression

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
		dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by a solid object Find patterns in the way that the sizes of shadows change.			Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them
			Electricity Identify common appliances that run on electricity Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit Recognise some common conductors and insulators, and associate metals with being good conductors.		Electricity Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Use recognised symbols when representing a simple circuit in a diagram.
			Sound Identify how sounds are made, associating some of them with something vibrating Recognise that vibrations from a sound travel through a medium to the ear. Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the vibrations that produced it. Recognise that sounds get fainter as the distance from the sound source increases.		
				Earth and Space Describe the movement of the Earth, and other planets, relative to the Sun in the solar system Describe the movement of the Moon relative to the Earth Describe the Sun, Earth and Moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night and the apparent movement of the Sun across the sky	Evolution Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.
