## My times tables practice sheet

Name $\qquad$
Write the number of the times tables you are practicing at the moment in the star. Multiply each number in the top grid by the number in the star. Write your answer in the bottom grid. At the end, check your answers carefully using a times table chart. Don't give up! Keep persevering and you will get better. You could test yourself against the clock too. Finally, when you really know your times tables facts for this number, go to the next times tables to challenge yourself all over again.
