

- This is the South Avenue Primary calculation policy that teachers use to plan. It reflects the Kent Scheme of Work. Our aim is to develop a deep understanding through clear steps of progression from Early years to Year Six. ***In addition to these written methods, teachers ensure children think –can I do it in my head, with some jottings or by using a written method?***

Multiplication

Multiplication		Examples
Year R	I can double objects practically.	
Year 1	I can multiply using manipulatives and arrays to show 'groups of.'	 
Year 2	I can understand multiplication as repeated addition	

- This is the South Avenue Primary calculation policy that teachers use to plan. It reflects the Kent Scheme of Work. Our aim is to develop a deep understanding through clear steps of progression from Early years to Year Six. ***In addition to these written methods, teachers ensure children think –can I do it in my head, with some jottings or by using a written method?***

Year 3	<p>I can multiply 2 digit numbers by 1 digit numbers using arrays.</p> <p>I can partition a 2 digit number to multiply using an expanded written method.</p>		<p>Multiplying a 2 digit number by a 1 digit number by partitioning</p> $32 \times 2 = 30 \times 2 \text{ and } 2 \times 2$ $= 60 \text{ and } 4 = 64$
Year 4	<p>I can use expanded vertical method to multiply 2 digits numbers by 3 digits. I can multiply money to 2 decimal places.</p>	$\begin{array}{r} 196 \\ \times 9 \\ \hline 54 \text{ (} 6 \times 9 \text{)} \\ 810 \text{ (} 90 \times 9 \text{)} \\ 900 \text{ (} 100 \times 9 \text{)} \\ \hline 1764 \end{array}$	
Year 5	<p>I can use formal vertical method to multiply HTU, ThHTU and 2 decimal places.</p>		<p>Long multiplication compact method with HTU x TU</p> $\begin{array}{r} 235 \\ \times 53 \\ \hline 705 \text{ x } 3 \\ 11750 \text{ x } 50 \\ + 705 \\ \hline 11750 \\ \hline 12455 \end{array}$
Year 6	<p>As year 5 including using their knowledge of the order of operations (BODMAS) to solve problems involving a combination of addition, subtraction, multiplication and/or division</p> <p>Algebra</p>	$\begin{array}{r} 235 \\ \times 53 \\ \hline 705 \text{ x } 3 \\ 11750 \text{ x } 50 \\ + 705 \\ \hline 11750 \\ \hline 12455 \end{array}$	

$$a \times b = 36$$

What could the values of a and b be?
