

Design Technology

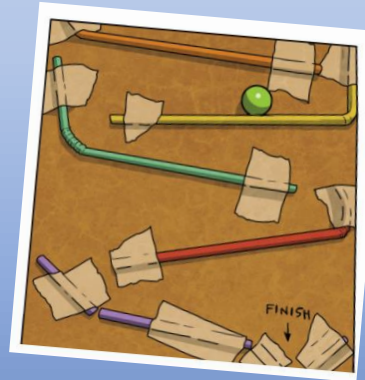

What I should already know:

- That products are designed and made.
- That instructions tell us how to follow designs and make products.
- That it is important to follow basic safety procedures.

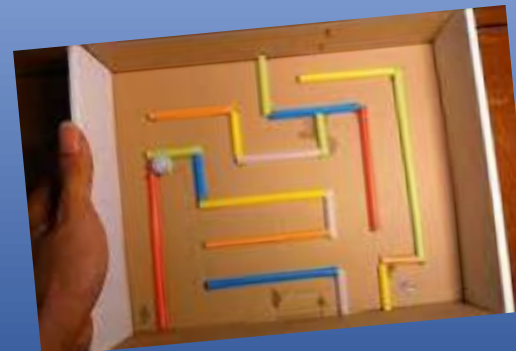

What I will learn:

- To say whether a product is for themselves or others.
- To describe what a product is for.
- Plan by suggesting what to do next.
- To mark out, cut and shape materials and components.

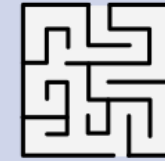

Key Facts

- A product is something you use.
- A user is someone that uses it.
