

Term 5 Science – What plants need.

This term we will be learning about what plants need and exploring the requirements for life and growth. We will learn to understand that the requirements such as air, light, water, nutrients from soil and room to grow can vary from plant to plant.

What we already know:

We have already learnt about MRS NERG and what that stands for in Year 2. We are also able to identify what plants need to grow. We can observe and describe how seeds grow and the main parts of a plant and their functions.

By the end of the topic I will be able to:

- Gather, record and present data in a variety of ways to help answer questions.
- Identify differences and similarities related to plants
- Set up simple practical and fair tests.
- Explore the requirements of plants for life and growth
- Compare plant growth in different soils and investigate water levels.

Key Vocabulary

Leaf	Stem
Root	fruit
Leaves	Vegetables
Bud	Bulb
Flower	Seed
Blossom	Growth
Petals	Soil
